

July 26, 1949.

Dr. Carl F. Cori,
Dept. Biological Chemistry,
School of Medicine,
Washington University,
St. Louis, Mo.

Dear Dr. Cori:

I would appreciate the favor very much if I could receive the recent and current publications from your laboratory on the action of polysaccharide-synthesizing and degrading enzymes. We are very much interested in these questions from the point of view of the determination of macromolecular specificity, and for biochemical-genetic studies on these processes in bacteria (Cf. Doudoroff et al., JEC, 179:921, June 1949).

Yours sincerely,

Joshua Lederberg
Assistant Professor of Genetics
